

COOPERATION: HOW TO MODEL IT, HOW TO FOSTER IT, AND HOW IT MIGHT HAVE EMERGED

COOPERATION IN THE FIELD

Adrian Haret

a.haret@uva.nl

November 2-9, 2023

A breakdown of what we'll be
focusing on.

The Story of Cooperation

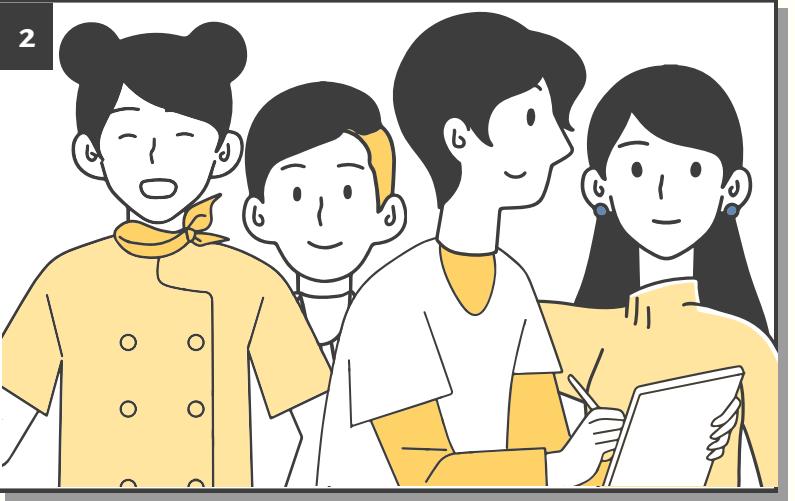

Cooperation is everywhere among living things.

The Story of Cooperation

Cooperation is everywhere among living things.

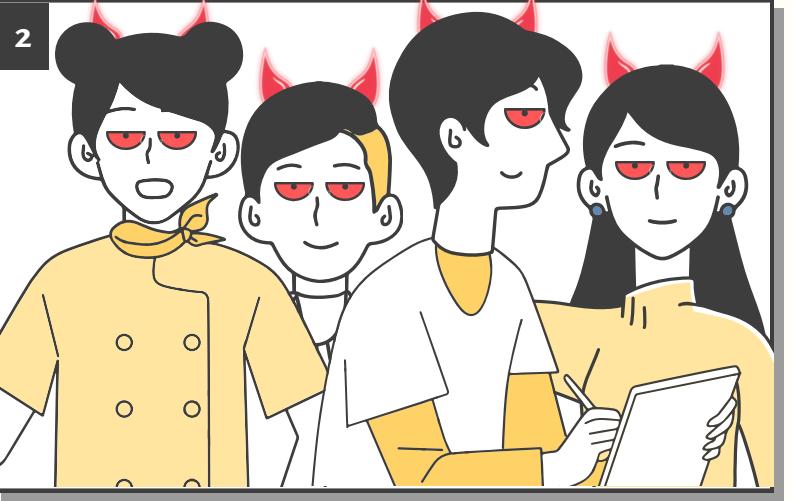

But how, when everyone is in it only for themselves?

The Story of Cooperation

Cooperation is everywhere among living things.

But how, when everyone is in it only for themselves?

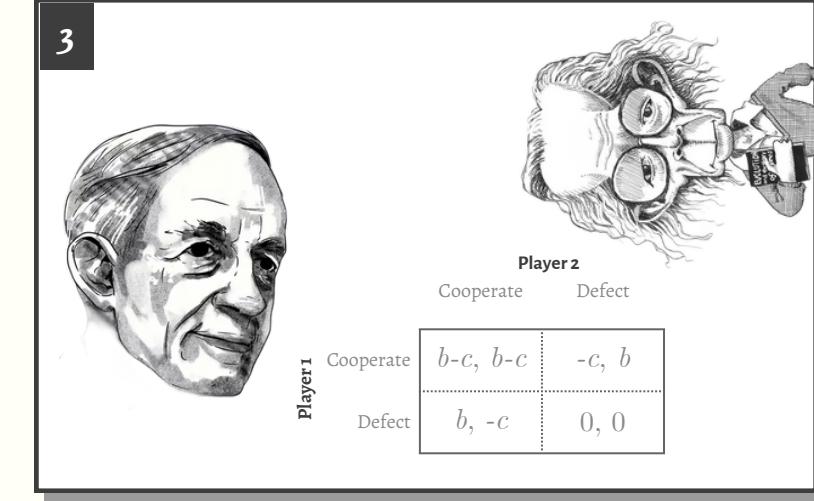

The Story of Cooperation

Cooperation is everywhere among living things.

But how, when everyone is in it only for themselves?

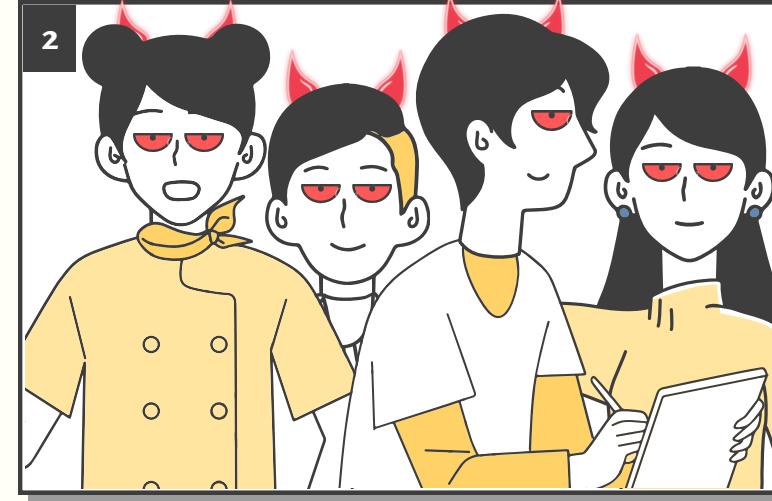

Game theory is the perfect tool to study the puzzle of cooperation.

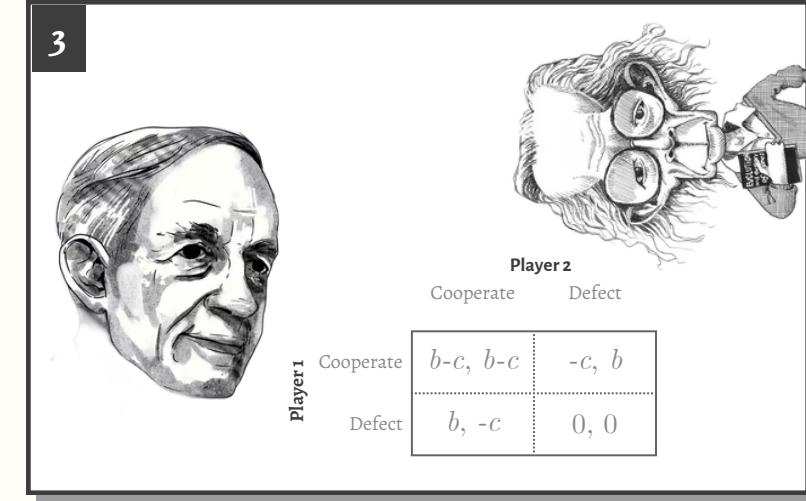

The Story of Cooperation

Cooperation is everywhere among living things.

But how, when everyone is in it only for themselves?

Game theory is the perfect tool to study the puzzle of cooperation.

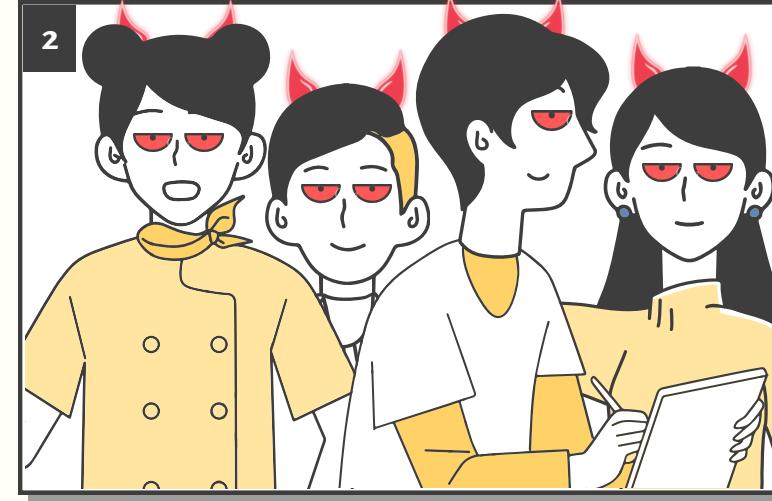

We'll look for plausible mechanisms capable of ensuring cooperation in a world of selfish individuals.

or selection based on kinship and group membership.

punishments and rewards...

trust and reputation...

Such as reciprocity...

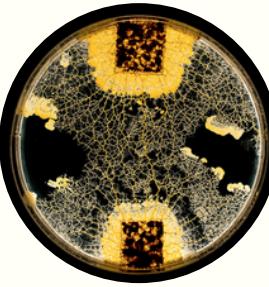

Where does cooperation occur?

Where does cooperation occur?
Let's see some examples.

SLIME MOLDS

SLIME MOLD ELDER
Slime molds are single-celled organisms, amoebas living in the
ground.

Solman, P. (2012, April 5). Slime Molds: No Brains, No Feet, No Problem. *PBS NewsHour*.

Kin, K., & Schaap, P. (2021). Evolution of Multicellular Complexity in The Dictyostelid Social Amoebas. *Genes*, 12(4).

SLIME MOLD ELDER

Slime molds are single-celled organisms, amoebas living in the ground.

When resources are scarce, slime molds group together to form stalks with bulbs (fruits bodies) at one end.

Solman, P. (2012, April 5). Slime Molds: No Brains, No Feet, No Problem. PBS NewsHour.

Kin, K., & Schaap, P. (2021). Evolution of Multicellular Complexity in The Dictyostelid Social Amoebas. *Genes*, 12(4).

SLIME MOLD ELDER

Slime molds are single-celled organisms, amoebas living in the ground.

When resources are scarce, slime molds group together to form stalks with bulbs (fruiting bodies) at one end.

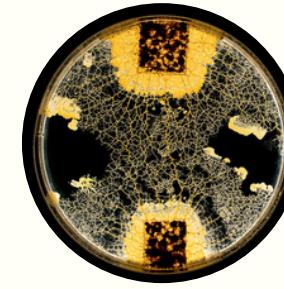

The fruiting body contains spores that end up producing other slime mold cells.

Solman, P. (2012, April 5). [Slime Molds: No Brains, No Feet, No Problem](#). PBS NewsHour.

Kin, K., & Schaap, P. (2021). Evolution of Multicellular Complexity in The Dictyostelid Social Amoebas. *Genes*, 12(4).

SLIME MOLD ELDER

Slime molds are single-celled organisms, amoebas living in the ground.

When resources are scarce, slime molds group together to form stalks with bulbs (fruiting bodies) at one end.

The fruiting body contains spores that end up producing other slime mold cells.

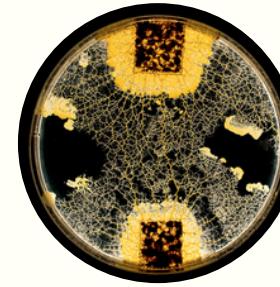

Meanwhile the cells in the stalk die, having ‘sacrificed’ themselves.

Solman, P. (2012, April 5). [Slime Molds: No Brains, No Feet, No Problem](#). PBS NewsHour.

LEAFCUTTER ANTS

E. O. WILSON

Leafcutter ants have complex, highly organized societies.

Holldobler, B., & Wilson, E. O. (2010). *The Leafcutter Ants: Civilization by Instinct* (Illustrated edition). Norton & Company.

E. O. WILSON

Leafcutter ants have complex, highly organized societies.

With very defined roles: a (single) queen, males, workers.

Holldobler, B., & Wilson, E. O. (2010). *The Leafcutter Ants: Civilization by Instinct* (Illustrated edition). Norton & Company.

E. O. WILSON

Leafcutter ants have complex, highly organized societies.

With very defined roles: a (single) queen, males, workers.

And caste-based division of labor: some ants forage for food (leaf fragments), others handle the foraged food back at the nest.

Holldobler, B., & Wilson, E. O. (2010). *The Leafcutter Ants: Civilization by Instinct* (Illustrated edition). Norton & Company.

E. O. WILSON

Leafcutter ants have complex, highly organized societies.

With very defined roles: a (single) queen, males, workers.

And caste-based division of labor: some ants forage for food (leaf fragments), others handle the foraged food back at the nest.

Remarkably, leafcutter ants farm a special type of fungus, which they use as food.

Holldobler, B., & Wilson, E. O. (2010). *The Leafcutter Ants: Civilization by Instinct* (Illustrated edition). Norton & Company.

Dominants do most of the breeding: about 90% of the pups are born to the dominant female.

By the natural ordering of things, subordinates help the dominants raise their offspring.

why?!?

For instance, if a subordinate finds a scorpion, common sense dictates they will deliver it to the children of the dominants.

mmm scorpions... 😊

Griffin, A. S., Pemberton, J. M., Brotherton, P. N. M., McIlrath, G., Gaynor, D., Kansky, R., & Clutton-Brock, T. H. (2003). A genetic analysis of breeding success in the cooperative meerkat (*Suricata suricatta*). *Behavioral Ecology*, 14(4), 472–480.

A collage of black silhouettes of people against a warm-toned background. The silhouettes are arranged in a loose, overlapping composition. In the foreground, a person is seated at a desk, looking down at a laptop. Behind them, several other figures are standing or sitting, some appearing to be in conversation or looking towards the right side of the frame. The background has a warm, golden-yellow glow with some faint, glowing shapes and lines.

PEOPLE

GEORGE FREDERIC WATTS

People sometimes engage in amazing acts of altruism.

GEORGE FREDERIC WATTS

People sometimes engage in amazing acts of altruism.

You can see a glimpse of this at the *Memorial of Heroic Self-Sacrifice* in Postman's Park, London.

GEORGE FREDERIC WATTS

People sometimes engage in amazing acts of altruism.

You can see a glimpse of this at the *Memorial of Heroic Self-Sacrifice* in Postman's Park, London.

(that I set up)

AMELIA KENNEDY

AGED 19

DIED IN TRYING TO

SAVE HER SISTER
FROM THEIR BVRNING HOVSE

IN EDWARD'S LANE STOKE
NEWINGTON · OCT · 18 · 1871 ·

FREDERICK ALFRED CROFT

INSPECTOR · AGED 31

SAVED A LUNATIC WOMAN

FROM SUICIDE AT WOOLWICH
ARSENAL STATION · BUT WAS
HIMSELF RUN OVER BY THE TRAIN

JAN · 11 · 1878 ·

is there anything in it for them?
does that even matter?

People sometimes engage in amazing acts of altruism.

GEORGE FREDERIC WATTS

You can see a glimpse of this at the *Memorial of Heroic Self-Sacrifice* in Postman's Park, London.

(that I set up)

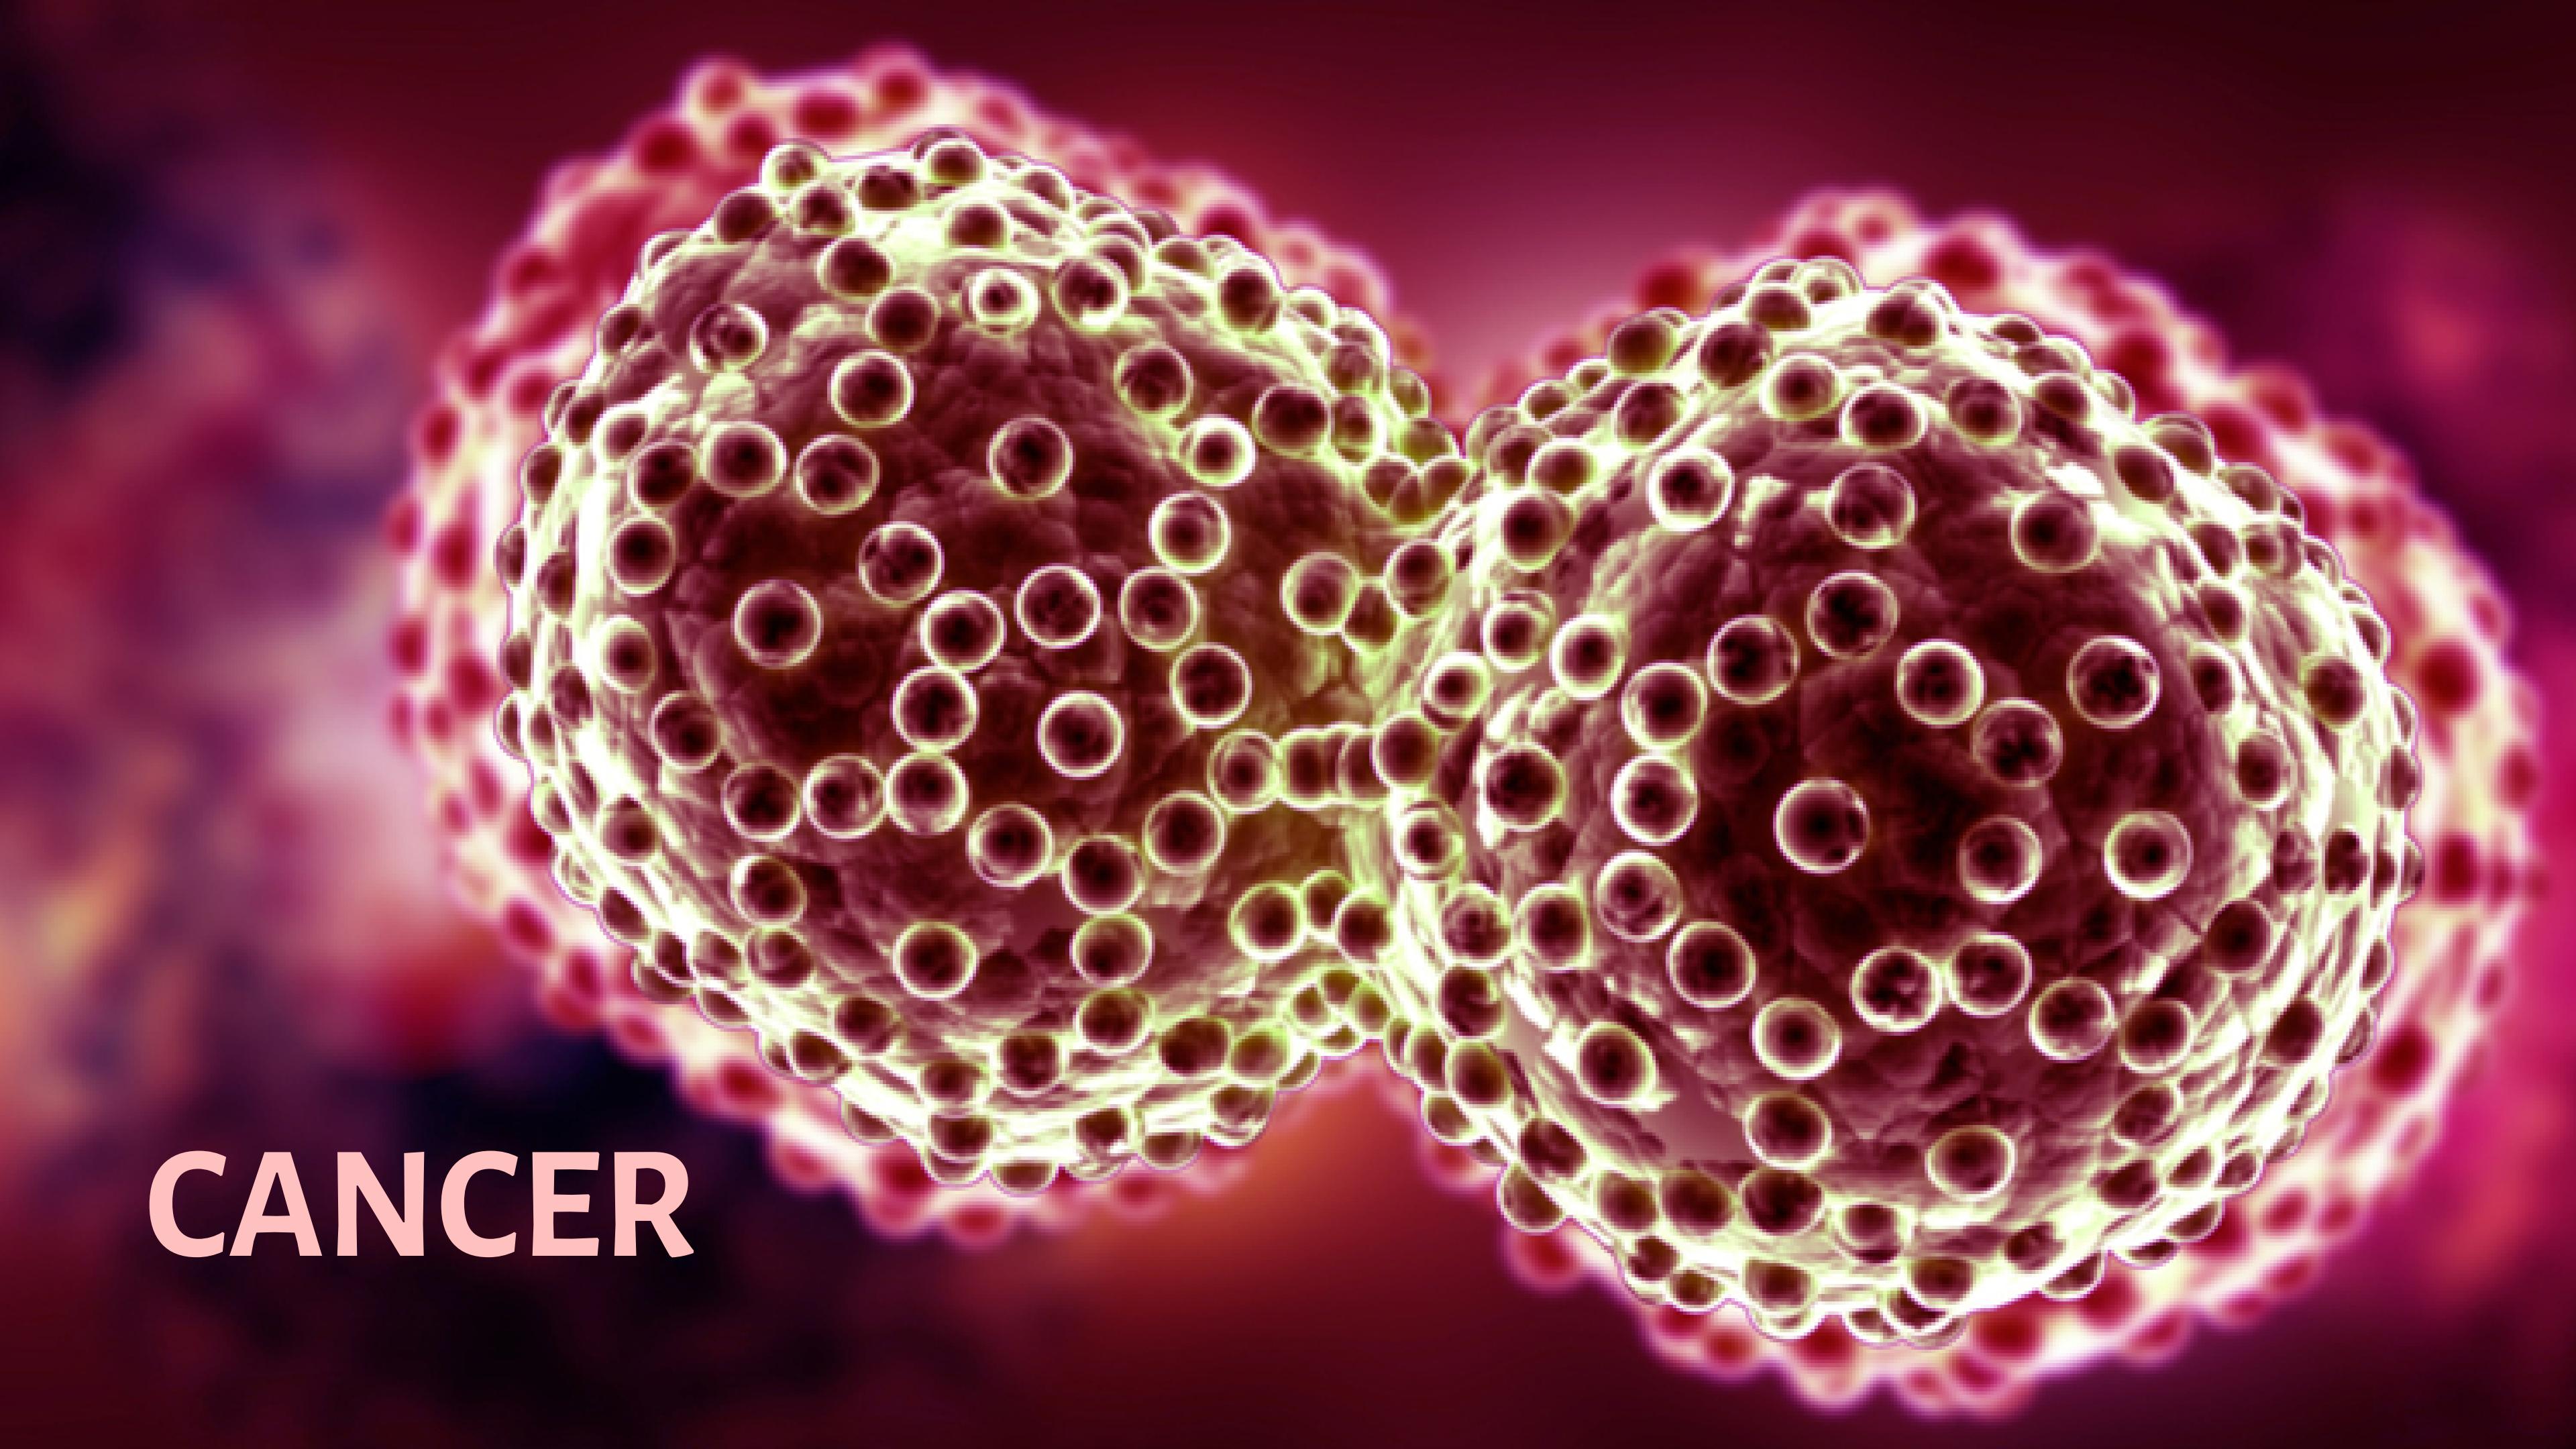

There are many example of humans being altruistic.

But these are anecdotes.

How altruistic are people *really*?

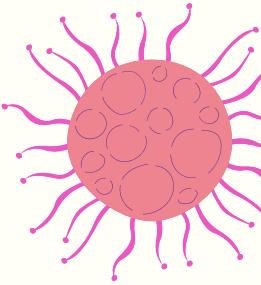

Let's also look at some *failures* of cooperation.

CANCER

CANCER CELL ELDERS

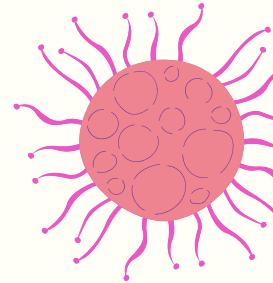

In a normally functioning organism, cells are cooperative:
liver cells do liver stuff, skin cells do skin stuff.

Aktipis, C. A., Boddy, A. M., Jansen, G., Hibner, U., Hochberg, M. E., Maley, C. C., & Wilkinson, G. S. (2015). Cancer across the tree of life: cooperation and cheating in multicellularity. *Philosophical Transactions of the Royal Society of London. Series B, Biological Sciences*, 370(1673).9

CANCER CELL ELDERS

In a normally functioning organism, cells are cooperative:
liver cells do liver stuff, skin cells do skin stuff.

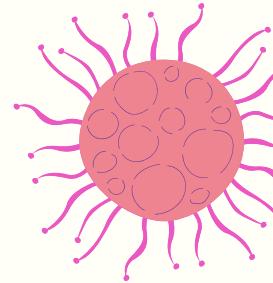

But sometimes, as result of mutation, cells go rogue and start multiplying uncontrolled, siphoning off resources from other cells.

Aktipis, C. A., Boddy, A. M., Jansen, G., Hibner, U., Hochberg, M. E., Maley, C. C., & Wilkinson, G. S. (2015). Cancer across the tree of life: cooperation and cheating in multicellularity. *Philosophical Transactions of the Royal Society of London. Series B, Biological Sciences*, 370(1673).9

ANARCHIST BEES

BEE ELDER
With our distant cousins the ants, workers are usually
sterile.

- Oldroyd, B. P., Smolenski, A. J., Cornuet, J.-M., & Crozler, R. H. (1994). Anarchy in the beehive. *Nature*, 371(6500), 749–749.
- Ratnieks, F. L. W., Foster, K. R., & Wenseleers, T. (2006). Conflict resolution in insect societies. *Annual Review of Entomology*, 51, 581–608.

BEE ELDER
With our distant cousins the ants, workers are usually
sterile.

But worker bees *can* lay eggs—just that normally they leave this task to the queen.

Oldroyd, B. P., Smolenski, A. J., Cornuet, J.-M., & Crozler, R. H. (1994). Anarchy in the beehive. *Nature*, 371(6500), 749–749.

Ratnieks, F. L. W., Foster, K. R., & Wenseleers, T. (2006). Conflict resolution in insect societies. *Annual Review of Entomology*, 51, 581–608.

BEE ELDER
With our distant cousins the ants, workers are usually
sterile.

But worker bees *can* lay eggs—just that normally they leave this task to the queen.

There is, however, a mutation that turns worker bees into anarchists that keep laying eggs (even when there is a queen).

Oldroyd, B. P., Smolenski, A. J., Cornuet, J.-M., & Crozler, R. H. (1994). Anarchy in the beehive. *Nature*, 371(6500), 749–749.

CORRUPTION

“

Corruption is an abuse of
entrusted power for private gain.

Transparency International. *Long Methodological Brief*, p.2.

DON CORLEONE

The way I like to think about it is, you take things from this
big pot lying around, and you put it into the pockets of your
family.

DON CORLEONE

The way I like to think about it is, you take things from this
big pot lying around, and you put it into the pockets of your
family.

I don't see anything wrong with that.

CLIMATE CO₂ CENTRAL

Cyclone Freddy

In 2023, around 500,000 people were estimated to have been affected by floods, mudslides and wind damage following the passage of Tropical Cyclone Freddy in southern Malawi.

JOSEPH STIGLITZ

Poor countries should be provided with \$300bn a year from
the International Monetary Fund to finance their fight
against the climate crisis.

Elliott, L. (2023, October 13). [IMF should give poor countries \\$300bn a year to fight climate crisis, says Joseph Stiglitz. The Guardian.](#)

JOSEPH STIGLITZ

Poor countries should be provided with \$300bn a year from
the International Monetary Fund to finance their fight
against the climate crisis.

It will probably be impossible to get this through the US
Congress in its current deadlocked state though...

Elliott, L. (2023, October 13). [IMF should give poor countries \\$300bn a year to fight climate crisis, says Joseph Stiglitz. The Guardian.](#)

JOSEPH STIGLITZ

Poor countries should be provided with \$300bn a year from the International Monetary Fund to finance their fight against the climate crisis.

It will probably be impossible to get this through the US Congress in its current deadlocked state though...

why wouldn't the US want to help
poorer countries?

Elliott, L. (2023, October 13). [IMF should give poor countries \\$300bn a year to fight climate crisis, says Joseph Stiglitz](#). *The Guardian*.

A cell, a worker bee, a person, a US
congressman: why should they
cooperate with others?

Wait a minute. So what exactly do we mean by cooperation?

DEFINITION (PRELIMINARY)

A behavior is *cooperative* if it provides a benefit to another party, at a cost.

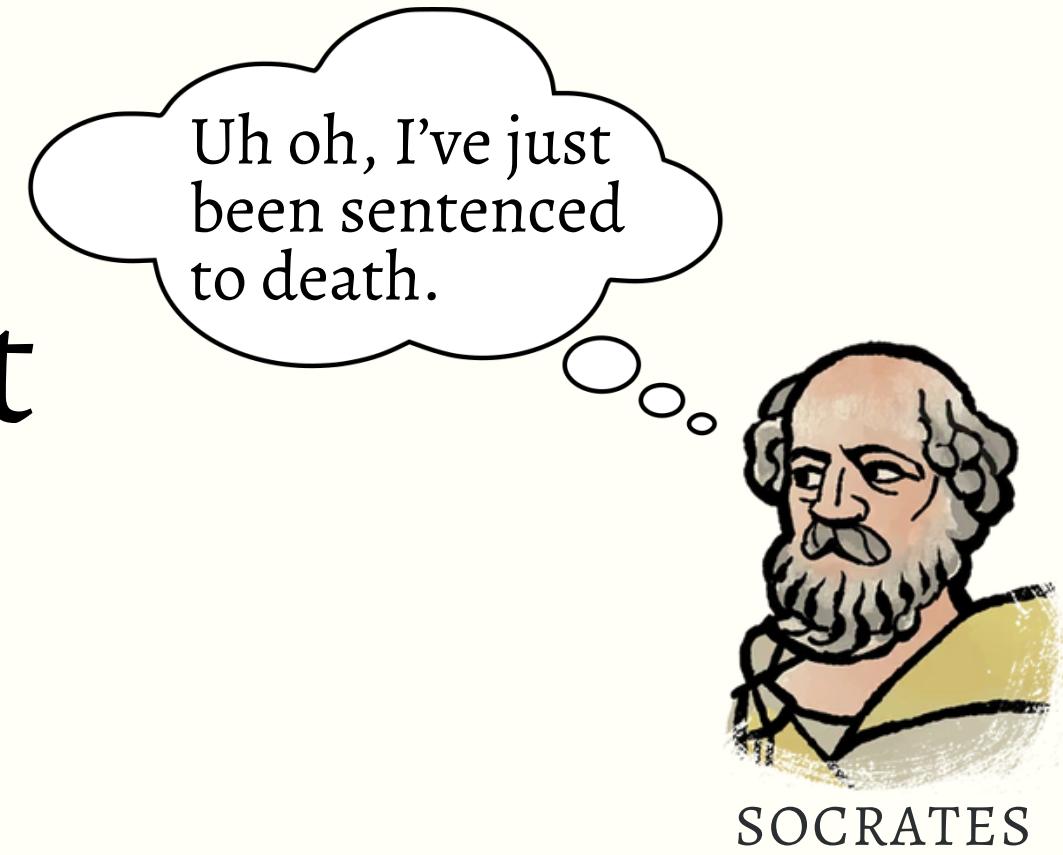

DEFINITION (PRELIMINARY)

- 1 A behavior is *cooperative* if it provides a benefit to another party, at a cost.

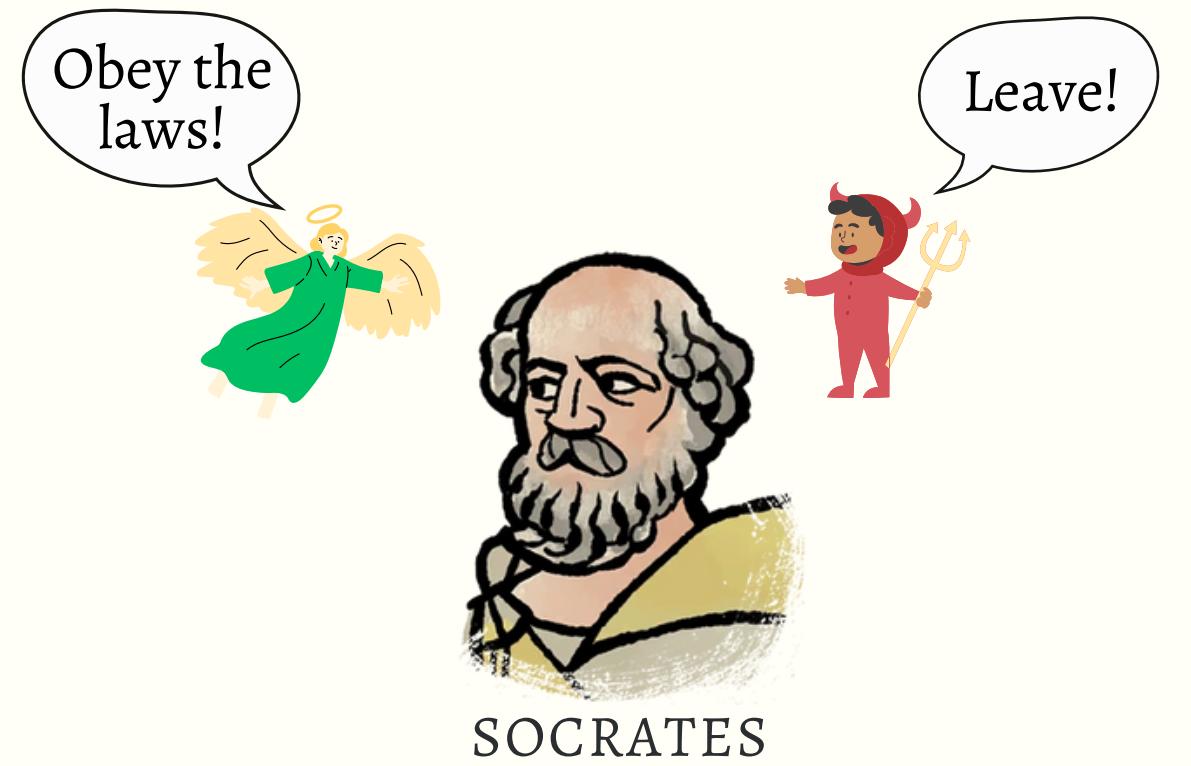

*does not include situations where
both parties are immediately
better off (e.g., trade).*

There should be a cost to
cooperation... and there's the rub.

Cooperation: the age-old
conflict between self-interest
vs (some version of) the
common good.

Cooperation: the age-old
conflict between self-interest
vs (some version of) the
common good.

We can make this drama more
precise.

We can make this drama more
precise.

With a little detour through...
